Boston's Restaurant & Sports Bar
Server - 3 years
2015 - 2018
+1 (970) 256-7651

📋 Projects

Project Armoire: Spring 2018
   Used the MERN Stack with CI, Docker, Github, Scrum, and Automated Testing.
   This project was done with a team of four, and was made for a client. More specifically, it was a platform for CS professors to grade CS students' code.

Awful Waffle LLC POS: 2017
   Used LAMP Stack with Stripe
   This was a project made for my special event vending business, that aided in recording transactions and processing payments through a web application.

Colorado AER: 2016
   Used LAMP Stack with Authorize.net
   This was a website I created to be an e-commerce website to buy vape related products.

Kluq.us: 2015
   Used LAMP Stack
   This was a social media website that used an influence factor to rank users.

🧑 About Me

   I am a 20 year old college graduate who who is motivated beyond belief. For example, I bought my own house with no co-signer at the age of 19 and have not look back since. Lastly, I am an entrepreneur, so I love to find solutions to problems around me!
